Le scale sono spesso vere e proprie protagoniste dell'architettura e la spina dorsale dello spazio; per questa ragione NovaBell ha progettato elementi ceramici capaci di modellarsi con estrema precisione e rigore.

**I gradini con larghezza 120 cm sono perfezionati in ogni dettaglio e possiedono vantaggi impareggiabili: completano le pavimentazioni facilitando la messa in opera sul massetto, sono coordinati al resto delle superfici e le loro dimensioni corrispondono agli standard progettuali.**

---

Stairs are often standout architectural features and the backbone of a space; consequently, NovaBell has designed ceramic elements that can be modelled with extreme precision and rigour. **120 cm-wide steps are perfected in every detail and offer incomparable advantages: they complete the flooring, facilitating installation on screed, they are coordinated with the rest of the surfaces and their dimensions correspond to design standards.**

Les escaliers forment bien souvent l'élément clou de l'architecture, mais un point faible au niveau de l'encombrement. Pour cette raison, NovaBell a mis au point des produits céramiques à même de s'adapter avec extrême précision et rigueur. **Les marches de 120 cm de large sont peaufinées dans les moindres détails et comportent des avantages sans pareils : elles complètent les revêtements de sol en simplifiant la pose sur chape, elles sont coordonnées au reste des surfaces et leurs dimensions sont conformes aux standards de la conception.**

Eine Treppe ist oft das markanteste Element einer architektonischen Gestaltung und durchzieht den Raum wie ein Rückgrat. Aus diesem Grund hat NovaBell keramische Elemente entwickelt, die sich dieser Form mit äußerster Präzision anpassen. **Die Stufen mit einer Breite von 120 cm sind bis ins kleinste Detail durchdacht und besitzen außergewöhnliche Vorteile: Sie bilden den Abschluss von Bodenbelägen und erleichtern den Einbau auf dem Estrich, sie sind auf die übrigen Oberflächen abgestimmt und ihre Abmessungen entsprechen den Planungsstandards.**
